Staff Sgt. David Jensen, a Fox 202 Air Defense Artillery section

sergeant, is awarded the Army

Commendation Medal by Maj.

commanding general. Jensen

Guardsmen save supply route, accept awards

May 5, 2004

By Spc. Andy Miller, 122nd Mobile Public Affairs Detachment

BAGHDAD, Iraq - "BOOM!" The car exploded and there was nothing left but nuts and bolts.

It started out as an average day for Staff Sgt. David Jensen and Sqt. Bruce Hartman of Fox 202 Air Defense Artillery, part of the Illinois National Guard, attached to the 1st Cavalry Division. The past week had been rough on them. They had been involved in ambushes, attacks and firefights, but today was just another day patrolling the streets of Baghdad.

Then it happened. A broken down car was parked on their patrol route.

"There was something suspicious about it, and we try to check everything that is suspicious," Maj. Michael Kessel, the Fox 202 commander said. "If something doesn't look right, we stop and take a look at it. That is pretty much our [standard operating procedure]."

After driving by the dubious looking vehicle, Jensen decided to turn his patrol convoy around for a better look. His squad put up a perimeter for security as Jensen examined the Gen. Peter Chiarelli, 1st. Cav. Div. vehicle.

helped find and remove a large "We were looking at it through the [binoculars]," Jensen said. vehicle-borne improvised "We got closer and closer, and we were checking every angle explosive device while patrolling a of it. I walked up, saw that there was a cell phone sitting on major coalition supply route. (U.S. the dash and a package on the driver side and yelled out, 'get Army photo by Spc. Andy Miller) the [heck] out of here', and ran back over."

That was when they decided to call an Explosive Ordnance Disposal (EOD) crew to the site to take care of the improvised explosive device. When EOD arrived, they noticed Hartman's M-14 sniper rifle and asked him for a favor.

"Hartman, was the sniper who took out the detonating device," Kessel said. "The interesting thing is, he's trained as a cook. It took two shots, one to knock out the windows, and then to knock out the detonation device."

With the windows shattered, and the detonation device

destroyed, the scene was safe for EOD. They blew the vehicle up in place.

"After the explosion...we drove back and the car was gone," Hartman said. "The body of the car was gone, the frame, the axels, the motor, everything was gone. It was just nuts and bolts."

In an instant, what could have turned into catastrophe on a busy coalition supply route, turned into simple nuts and bolts. Jensen and Hartman were each awarded Army Commendation Medals by Maj. Gen. Peter Chiarelli, the 1st Cav. Div. commanding general, during a ceremony that took place at division headquarters.

improvised explosive device. His actions helped prevent a catastrophe on a major coalition supply route. (U.S. Army photo by you haven't been trained to do, but you step up and do Spc. Andy Miller)

According to Jensen and Hartman, they were just doing their jobs. Its one of those things, maybe something vous their jobs. Its one of those things, maybe something their jobs. Andy Miller)

"Neither of us are in it for awards, nobody is in it for awards," Jensen said. "At the time we didn't think about a bridge being blown up or anything. Just like any IED, it would have done harm to somebody."
